

RAJA ANTONY MANDAL

Technical Writer | Documentation Engineer

Boston, MA | mandal.ra@northeastern.edu | +16178740787 | LinkedIn: <https://www.linkedin.com/in/raja-antony/>

PROFESSIONAL SUMMARY

Technical writer with 7+ years of experience creating developer-facing documentation for engineering teams at companies like Tesla and VISME. I specialize in API references, SDK guides, how-to guides, conceptual overviews, and reference materials, and I work closely with engineers, QA, and product stakeholders to make sure everything is accurate and useful. I am comfortable managing multiple documentation projects simultaneously and have a strong background in docs-as-code workflows, structured authoring, and reading source code in C++ and JavaScript to identify what needs documentation.

WORK EXPERIENCE

Tesla, Gigafactory Nevada – Technical Writer Intern

July 2025 - Sep 2025 + Jan 2026 - Apr 2026

- Gathered functional requirements from 15+ engineers, QA and product partners and translated them into 50+ how-to guides, conceptual overviews, and reference materials documenting use cases, aligned with SDLC milestones.
- Led cross-functional documentation reviews with 5 to 20 stakeholders, incorporating 100% of critical SME feedback within 48 hours and tracking all action items in JIRA and Confluence to maintain schedule accuracy.
- Standardized developer-facing documentation workflows using modular authoring (DITA, XML) and version control (SVN), reducing operator errors by 18% and improving content reuse across releases.
- Managed 75+ document revisions across SharePoint and JIRA, prioritizing tasks across multiple concurrent projects and meeting 100% of committed deadlines in a fast-paced environment.

Northeastern University, Boston - Research Assistant

Dec 2024 – June 2025

- Conducted stakeholder interviews with 10+ faculty members to gather requirements and convert complex workflows into structured how-to guides and reference documentation, adhering to defined style guides.
- Performed content audits using Ahrefs and SEMrush, restructuring 50+ documentation pages through improved information architecture and usability standards to enhance findability.
- Analyzed 500+ survey responses and presented structured findings on documentation effectiveness to senior leadership, contributing to a 25% improvement in campaign performance.

VISME, Maryland - Content Strategist + Technical Writer

Oct 2021 – Aug 2024

- Partnered with software developers and product managers to plan and write 100+ developer-facing documentation assets, including API references, SDK guides, UX copy, and conceptual overviews for SaaS products.
- Translated stakeholder inputs into structured how-to guides and requirements documentation using Markdown, Sphinx, and reStructuredText, reducing revision cycles by 50%.
- Implemented docs-as-code workflows using GitHub and Docker to version-control developer-facing content, reducing duplication by 40%, and created custom style guides that accelerated publishing speed by 30%.
- Reviewed documentation metrics and user feedback to identify content gaps, restructuring underperforming articles to improve findability, technical accuracy and reduce support ticket volume.

WriteTurn Services, Kolkata - Technical Writer

Mar 2018 - Mar 2020

- Authored 200+ developer guides, reference materials, and structured use-case documentation in XML, Markdown, and Sphinx, increasing self-service support by 18% and improving QA readiness across releases.
- Collaborated with software engineers and QA to document 150+ functional requirements, edge cases and validation workflows against Python and C++ codebases, achieving zero QA validation errors across releases.
- Built modular, reusable documentation using structured authoring principles, reducing content duplication by 40% and enabling scalable multi-platform documentation updates.
- Created 55+ process flows and diagrams using Figma and Adobe Illustrator to clarify complex engineering workflows, reducing clarification cycles by 30% across 3 engineering teams.

EDUCATION

Northeastern University, Boston, MA, USA

Sep 2024 - Jun 2026

Master of Science in Digital Media and Communication, GPA: 3.9

Coursework: Web Development (HTML, CSS, JavaScript), Programming foundations (C++, JavaScript, GO, Java), Project Management, UI/UX, Information Architecture, Agile Methodologies

University of Kalyani, Nadia, WB, India

July 2016 – Aug 2019

Bachelor of Arts, English Literature (British and American)

TECHNICAL KNOWLEDGE

Tools/Tech: JIRA, SharePoint, SVN, Enovia, Fisheye, Confluence, MS Word, Adobe Illustrator, Docker, Sphinx, reStructuredText, Markdown, Oxygen XML, Wrike, FrameMaker, Arbortext Editor, SDL Tridion, GitHub, Figma

Markup & Languages: Markdown, HTML, CSS, XML, DITA, reStructuredText, JavaScript (coursework), C++

Skills: Developer-Facing Documentation | API and SDK Documentation | How-to Guides and Conceptual Overviews | Reference Materials and Playbooks | Docs-as-Code | Modular and Structured Authoring | Style Guide Creation | Cross-Functional Collaboration | Documentation Metrics and Content Audits | Version Control
